

YOLO

Compost made fun!

At Compost Matters, we've taken the concept of compost tumbling and have made it even better through good design and smart engineering.

Our YOLO Compost Tumbler is a convenient method to compost organic waste from the kitchen and garden. As a closed-bin system, compost tumbling matures compost faster than compost heaps and has the advantage of being rat, dog, possum and pest proof. Our YOLO Compost Tumblers take little space, are odour-free, and they are suitable for homes with large gardens, small gardens or no gardens.

CONVENIENT COMPOSTING

Compost tumblers have many qualities in their favour:

- High temperatures are maintained in the container – ideal for year-round composting
- Reduces the amount of waste you send to landfill
- The closed container keeps heat and moisture inside
- Tumbling aerates the material to keep microbes active
- Odour-free: the container is closed
- Compact and suitable for the urban environment
- Various sizes for apartments, townhouses, sprawling yards, restaurants or schools
- Once left to mature, material becomes usable compost in six to 12 weeks
- Wall-mounted and closed, it is inaccessible to rodents, dogs and possums.
- YOLO Compost Tumblers are easy to turn, even when full.

We've put thought into making our YOLO Compost Tumbler an attractive addition to your yard. There's no need to hide it behind the garden shed or dog kennel. Rather, show your YOLO Compost Tumbler to friends, teach them about composting and let them give it a tumble.

If you have limited space, are passionate about recycling organic waste, our YOLO Compost Tumbler is for you.

YOLO Compost Tumbler

LARGE GARDEN. SMALL GARDEN. NO GARDEN.

Whether you live in a 3rd floor apartment or a house with a sprawling garden, there is a YOLO Compost Tumbler for you.

Available in three sizes as double-shell units: Small (2 x 45 litre shells), Medium (2 x 100-litre shells) and Large (2 x 200-litre shells).

The small is perfect for townhouses and apartments where the majority of the compostable material is kitchen waste and a little garden trimmings.

The medium is suited townhouses or homes with small gardens.

The large is suited to homes with small to medium-sized gardens.

The units come with double shells so that the second shell can be used while the contents in the first is maturing.

Prices incl GST:

- Small Yolo - \$330
- Medium Yolo - \$440
- Large Yolo - \$550
